Dear D. West,

I would like to draw to your attention the opening of the new Science Fiction Centre in the West end of London which is fully comprehensive. The Einstein Inter Sexion is the first shop in the history of the subject that has aimed at a comprehensive selection of Science fiction. This means that to some extent we want to provide a service and one that may be of national interest. We would like to stock s/f Fanzines, on a sale or return basis plus act as a recruitment centre for subscriptions. If you are interested in the promotion and sale of your mag. then you may like to send me copies on a sale or return basis and I will do my best to forward the subscription/s by return. In the meantime I would just like to mention that although of course the E.I.S. is a commercially orientated shop, it is under the guidance of one of S/F Fandoms most espoused patrons G. Hay and we do here talk of The 'inspired Light of genius' being at play When things get going for S/F fandom in the West.

So please be responsive and I hope I may be able to provide a service not only for your Fanzine but for Science Fiction Fandom as a Whole.

Yours faithfully,

B.G. OUZMAN.
